## · Nested Looping

- 1. Declarasi package -> package Nested Looping;
- 2. Impor library -> program tersebut tidak menggunakan impor library
- 3. bagian class -> Public class no2 {
- 4. Method main -> Public static void main (String [] args) {
- 5. Documentation section -> program tersebut tidale menogenakan komen
- · ) Array menaggunakan kaping
  - 1. pachage ->
  - 2. Impor library -> Tidah menggunakan impor library
  - 3. Dagian class -> public class array perulangan-3 {
  - q. Method main -> Public static void main (String () args){
  - 5. Documentation section -> // panyang array 3

## b. Jalannya Kode program
